

Project

A Taste of Chocolate *Bridgeville, PA*

This unique specialty store combines a love for chocolate as well as the aesthetic with its wonderfully original interior design. Giffin Interior was contracted to fabricate these display cases that are as delectable as the sweets inside.

Team

Owner: Tom Allen
 General Contractor: Costello Construction
 Architect: Gary Gorski

Craftsmanship

Each one of these pieces is an individual stained cherry showcase with MDF overlays created on a CNC router. The cases were attached in the field, and finished with a stained hardwood cherry top.

Retail

The overlays were put together like a puzzle. The routed pieces were made of fiberboard, ranging from 1/4" to 3/4" thickness to create the dripping chocolate affect. Each of the pieces was painted with a special color taken from the artist's color palette.

Customer Satisfaction

"Giffin did an amazing job with the display cases. I'm thrilled with the result; it's been a huge success for us."

Tom Allen, Owner-
