

## Project

### Cranberry Woods Business Center Cranberry Township, PA

This building makes extensive use of continuous reveals, which created a major installation challenge. Giffin Interior & Fixture devised a unique method for aligning the cherry paneling flush with the adjacent marble and granite. Additionally, the design called for the wall reveals to line up with changes in color and materials in the floor. Giffin's installation team flawlessly overcame this construction obstacle to carry out the designer's wishes.

## Team

Architect: CDS Associates - Herndon, Virginia  
 General Contractor: TEDCO Construction Company - Pittsburgh, PA

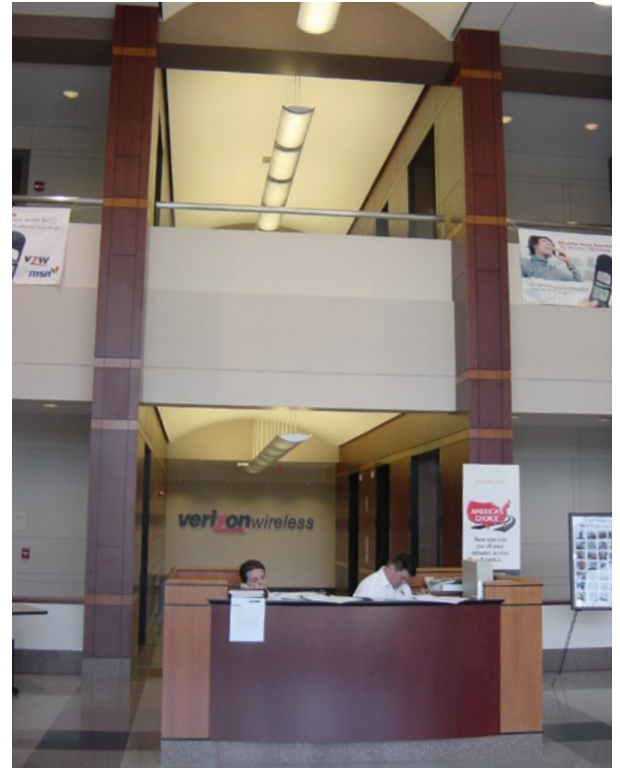

## Craftsmanship

Marble and granite are a great contrast to the paneling.

Two-tone cherry paneling trimmed with polished granite elevator surrounds creates a striking entrance and lobby.

Floor-to-ceiling cherry columns and a security desk are impressive displays of Giffin's ability to carry out the designer's vision.

Commercial

## Customer Satisfaction

"This fast-paced project mandated a professional team to meet the severe schedule requirements necessary to open the building on time. Giffin exceeded every requirement for the project."

- Sam Ward, Project Engineer, TEDCO
