

## Project

### Giant Eagle Market #14

*Bethel Park, PA*

This grocery store has undergone nearly three years of renovations to add an extensive number of new features, including an entire new wing. The transformation gives the store the feel of an open-air market, and not simply a supermarket.

## Team

General Contractor: MBM Contracting

Architect: McCormick Architects

## Craftsmanship

Giffin Interior has completed work in nearly every part of the renovation, including the Coffee/Juice Bar, the Leonidas Candy Case, the Demo Station, Candy Rotunda, and Coffee Roaster, all seen on this page.

Giffin also contributed work to the Customer Service Area, Pharmacy, Photo Center, Pizza and Sushi Bars, an Olive Bar, and the displays for Candles and Gifts.

There are distinctive facets to each new area. The Demo Station is a high-end kitchen in the middle of the store. The Leonidas Case features a fun striped laminate. The Coffee and Juice Bar, one of the focal points of the new market, combines space for coffee, blenders, fruit, registers, and lots of counter space, with a rare copper laminate as a highlight.

Grocery

## Customer Satisfaction

“Giffin Interior did a great job of managing a number of very different designs over the course of this project. We are very pleased with the results.”

Mark McCormick, Architect -
