

Project

The Burnett Center at Washington & Jefferson College Washington, PA

The ability to fabricate and install large volumes of cherry trims, case-work, and furniture on an accelerated schedule was the key to success with this project. Coordination with other trades was also essential, especially with regard to the computer desks. Solid communication with the electrical contractor enabled Giffin to fabricate custom furniture that far exceeded the school's expectations for their wired classrooms.

Team

Architect: MacLachlan, Cornelius, & Filoni, Inc. - Pittsburgh, PA
Contractor: Landau Building Company - Wexford, PA

Craftsmanship

This table, complete with tapered, solid cherry legs and bun feet, serves as a sturdy and elegant platform on which the college displays noteworthy and donated items.

Throughout the project, Giffin's cherry trim adorns the floors, doors, ceilings and staircases to enhance the building's appearance.

Custom, radiused desks meet the electrician's exact specifications and bring the college to the forefront of technology-based education in style.

Education

Customer Satisfaction

"The accelerated schedule compounded with difficult detailing demonstrated Giffin's ability to function efficiently and expertly at every turn throughout the project."

- Edward E. Hughes, Vice President, Landau Building Company
