

## Project

### Washington County Courthouse *Washington, PA*

This courtroom was reconfigured and then redone to match other courtrooms in the building. Intricate columns and millwork accent the room and add to the charm of the historic landmark.

## Team

General Contractor: Lone Pine Construction

Architect: Astorino

## Craftsmanship

Samples of trim and the spindles were taken from another courtroom to accurately match the work in red oak.

A mold was made from the sample spindle, and the new spindles were cast in plaster and faux finished to match the color and detail.

Government

## Customer Satisfaction

“One of the most difficult parts of this project was matching the work to the other courtrooms, and Giffin Interior did a great job putting it together.”

Gregory Kittridge, Lone Pine Construction -
